

Programme Guide

Quality management systems, clinical research and laboratory quality training for health and research professionals across Nigeria and West Africa.

Nestra Klinikal Limited · RC 1054356 · Ibadan, Oyo State, Nigeria

Who we are

Nestra Klinikal is a Clinical Research and Quality Management System Organisation incorporated in the Federal Republic of Nigeria in 2012, which began operations in November 2018. We help organisations, institutions, clinical research sites, medical diagnostic laboratories and pharmaceutical companies reach their quality management and quality assurance goals.

We work across GCP Quality Assurance, GMP, validation and verification, GCLP, GLP, ISO 15189 and ISO 17025 quality systems — through gap analysis, training, auditing, mentoring, monitoring and evaluation.

How the programmes fit together

Our training is staged. Most professionals begin at foundation or core level and progress as their responsibilities grow. Phlebotomy sits apart as a specialist practical certification.

STEP 1 · FOUNDATION

Foundation Certificate in Quality Management

An entry point for professionals new to quality management, covering the principles and vocabulary needed before taking on a quality role.

STEP 2 · CORE

Quality Management Systems & Quality Assurance

Our core certificate. Builds working competence in quality management systems and quality assurance for professionals already practising in laboratory, clinical research or regulatory roles.

STEP 3 · ADVANCED

Advanced Diploma in Quality Management Systems

In-depth mastery for senior practitioners who will lead quality function design, audit programmes and accreditation readiness within their organisations.

SPECIALIST TRACK

Phlebotomy Certification

A specialist practical certification in venous blood collection.

Supervised practical hours are mandatory. Certification for this programme is awarded only after you have completed the required supervised practical hours in person.

Also available

Internal Auditor Certification

Equips your own staff to plan, conduct and report internal audits against the quality standards that apply to your organisation.

GCP Quality Assurance for Clinical Research

Good Clinical Practice quality assurance for staff working on clinical trials and at research sites, covering site readiness and trial documentation.

Who these programmes are for

- Medical laboratory scientists
- Biomedical scientists
- Clinical research associates and site staff
- Nurses and clinical staff
- Pharmacists
- Quality and regulatory officers

For organisations

Beyond individual training we work directly with organisations on gap analysis, quality management system design and implementation, internal and supplier auditing, accreditation readiness for ISO 15189 and ISO 17025, and in-house cohorts trained on your own processes and documents.

Fees and intake dates

Fees are quoted in both Naira and US dollars, and current pricing and intake dates are confirmed on request. Message us on WhatsApp or email us and we will send the current schedule for the programme you are considering.

Talk to us

WhatsApp is the fastest way to reach us and most enquiries get a reply the same day.
